Executive

Management Survey of ORE Administrative Staff

*MP*

1. The attached management survey and accompanying comments from Assistant Directors in connection with the situation room problem are provided for your information and for further action in connection with paragraph 4 of the memorandum from the Management Officer dated 7 March 1950.

2. Other matters included in the survey report, including the problem in connection with Information Control, require no COAPS action at this time. A later request for review of the Information Control situation may be made after completion of the entire ORE survey.

3. Request a recommendation from COAPS as to the type and scope of an ORE situation room considered necessary for this Agency. In this connection, a previous verbal determination was made by the Director that it was not necessary to maintain in ORE a situation room in scope beyond that to meet ORE internal needs.
